**Cover Photo:** An elite flock of Kazakh Finewool Sheep owned by farmer Dulat Kegenbekov. The farm is located in the Almaty region in southeastern Kazakhstan. The flock is the result of many years of breeding and selection by Toleghen Kasenov, a scientist from the Sheep Breeding Institute in Kazakhstan. Mr. Kasenov worked with the sheep when they were owned by a Soviet state farm and continues to do selection now that the flock is privately owned. The photo was taken by Liba Brent.

# PREFACE

Each year, the Global Livestock Collaborative Research Support Program publishes an annual report in compliance with grant requirements. The 2005 Annual Report documents work completed during the fiscal year, October 2004 - September 2005. The principal investigators for each project submit reports on research conducted with GL-CRSP funding. Each report is the expression of the principal investigator with minor editing by the Management Entity. All individual reports give the name, address, telephone, fax number and email address of the principal investigator for that project. Inquiries are welcome.

Susan L. Johnson  
Annual Report Coordinator
